

# Read Me First

## Installation

Before **ConnectIt Professional** can be installed and configured, it is necessary to have the following set up on the target PC(s):

### Microsoft .net Framework v4.0

- **Microsoft .net framework** is downloaded as part of the **ConnectIt Professional** installation, or it can be downloaded and installed separately from the Microsoft website - <http://download.microsoft.com>
- The version required will depend upon your operating system. Please check this with your IT support administrator.

### Administrator privileges

You should be logged into the destination PC with local administrator privileges and ensure that no anti-virus or firewall software is running which could interfere with the installation. The **ConnectIt Registration** process also requires access to the internet.

## Step-by-Step Guides

To assist with the setup of **ConnectIt Professional**, please refer to the following **Step-by-Step Guides** which can be found in your **Windows Start | All Programs | ConnectIt Professional | Documentation** menu:
